

TERMS & CONDITIONS

Client Agreement

STUDIO	CLIENT	REFERENCE	DATE
PJM Studios	Dental Growth Lab	PJM-DGL	08/09/2026

This agreement is made between PJM Studios ("the Studio") and Dental Growth Lab ("the Client"), dated 08/09/2026.

01 Scope of work

The Studio will design and build a bespoke website for Dental Growth Lab, custom coded and built to the standard set out in the agreed proposal, reference PJM-DGL. A portion of this build is already complete: the design system, the homepage hero, the "Your Practice" scroll sequence and the "My Story" transformation have been built and shared as a working sample. This agreement covers completion of the full site. Any work falling outside this scope will be quoted separately and approved in writing before it begins.

02 Deliverables

A bespoke, custom-coded website comprising:

- Six pages: Home, Your Practice, My Story, How I Can Help, Results, and Book a Call
- A custom-coded Next.js and TypeScript build on a bespoke design system, not a template
- A persistent site header on every page with an always-visible Book a Call button, and a closing call-to-action in the footer of every page, both ready to link to the Client's booking calendar
- Smooth scroll with scroll-choreographed motion, and a distinct interactive graphic or infographic moment on each page for engagement
- Shaping and editing of the Client's supplied content into final web copy
- A Results page built as a testimonial layout (owner photo, practice, quote and Google rating), populated with testimonials supplied by the Client
- A Book a Call page with address, map, email, phone, and a contact form delivering enquiries by email
- Fully responsive across desktop, tablet and mobile, with reduced-motion fallbacks for accessibility
- On-page SEO foundations and performance optimisation
- Deployment to the Client's production domain, hosted on Vercel, with the code held on GitHub
- Optional: logo and brand mark design and development, if required

03 Timeline

Estimated delivery is three weeks from receipt of the deposit, assuming remaining content and assets are supplied on time. As an example, a start today would see the site live by Tuesday 29th. Delays in Client feedback or materials move the timeline accordingly.

04 Payment

Total project fee: £3,000. No VAT is charged.

A 40% deposit of £1,200 is due to secure the slot and begin work. The remaining 60% of £1,800 is due on completion, before the site is handed over and pushed live. Payment is by bank transfer. All invoices carry the reference PJMJ-DGL.

Bank transfer Jude Potter · Sort code 20-49-76 · Account 03870936

05 Care Plan

Once the site is live, the Client is enrolled on the PJMJ Care Plan at £50 per month, billed by bank transfer from the launch date. No VAT is charged. The plan covers:

- Hosting management, DNS and domain oversight, and running the site on Vercel
- Security patches, dependency updates and backups
- Uptime monitoring and priority support
- Up to two minor content changes each month

Anything beyond two minor changes, or any new feature or larger piece of work, is quoted and invoiced separately before it starts. The plan runs month to month and may be cancelled by either party with 30 days written notice.

06 Technical help (social, ads and setup)

Separately from the website build and the Care Plan, the Client may draw on the Studio for ongoing technical help with their marketing and online presence, charged at £25 per hour. No VAT is charged.

This is provided as needed, with no minimum and no tie-in, and covers work such as:

- Setting up the Client's booking calendar and connecting it to the website
- Setting up and configuring the Client's Facebook page, Instagram business profile and LinkedIn company page, and linking them to the site so everything works as one system
- Setting up and supporting Meta advertising: getting campaigns live, connecting them to the site and the booking calendar, and keeping that setup working
- Installing analytics and tracking so enquiries and ad performance are properly measured
- Guiding the Client through how it all fits together, and ongoing technical support, edits and integrations as they arise

How it works: time is logged as work is carried out. At the end of each month the Client receives a short summary of the work done and the total hours. The invoice is issued on the 25th of the month and is payable by the end of that month, by bank transfer. Either party may pause or stop this arrangement at any time with reasonable notice.

07 Ownership

On receipt of final payment, full ownership of the completed website, its code, its content and all assets created for this project transfers to the Client. From the moment the site goes live it is yours: it lives under your own registered domain and your own email domain, and it is yours to keep, move or change however you wish. The Studio may feature the completed work in its portfolio unless agreed otherwise in writing.

08 Domain

The Client's domain is registered in the Client's own name and control. This can be handled either way, whichever the Client prefers: the Studio can purchase the domain on the Client's behalf and transfer it across whenever the Client wants it, or the Studio can walk the Client through registering it themselves so it sits under the Client's own email and account from the very start. Either way, the domain belongs to the Client.

09 Hosting and transferability

The live site is hosted and managed by the Studio under the Care Plan. Everything is cloud-based, on Vercel with the code held on GitHub, so the site can be managed and updated from anywhere in the world with no dependency on the Studio's location. Should the Client ever leave the Care Plan, or wish to move the site to another developer, the Studio will hand over the complete codebase and a short guide to redeploy it elsewhere. Because the Client owns the code, it always goes with them.

10 Responsibilities of the Studio

The Studio will deliver the work to a professional standard, keep the Client updated at each phase, and provide full handover documentation on completion.

11 Responsibilities of the Client

The Client will supply, by the agreed dates: any remaining copy and content, the testimonials for the Results page (owner photo, practice and quote), brand assets and logins where needed, and their decision on the domain. For any technical help work, the Client will provide access to the relevant accounts (booking calendar, Meta, Facebook, Instagram, LinkedIn). The Client will provide consolidated feedback within 5 working days of each review, and confirms it holds the rights to all materials supplied.

12 Termination

Either party may end this agreement in writing. Work completed up to that point is chargeable, and the deposit is non-refundable.

13 Agreement

By signing below, both parties confirm they have read and accepted the terms set out above.
