

LET'S BUILD

Welcome aboard

Hey **Pujan**,

Really glad to have you on board. You have seen what the sample can do, now we get to build the whole thing out. Here is where we are and what we are getting on with.

What we are building

A bespoke, founder-led site for Dental Growth Lab, at the standard of the sample you have seen. The scroll storytelling, your real numbers, and interactive moments throughout, all pointing at one thing: booked calls.

Where we are right now

- 01** Agreement signed and deposit paid, so we are properly away. Cheers for sorting that so quickly.
- 02** Your copy doc is done and in, which is a brilliant head start.
- 03** We meet in person on Wednesday to lock the last pieces (more below).
- 04** I get building, and keep you posted as it takes shape.
- 05** Review round, your feedback, then the polish.
- 06** Final payment, then it goes live and it is all yours.

Wednesday, in person

Let us meet face to face on Wednesday. Your copy is already done, so this one is mostly the visual side: your logo, the colours and feel you are after, and anything else you want to add or tweak. We will lock the look and direction together, and from there I can get building with a clear picture in mind. It is the most valuable hour of the whole project, so it is worth doing in the room.

The domain and email

You asked me to sort the domain and a couple of addresses, and how they would work. Here is the plain version.

The domain. Yep, I will buy dentalgrowthlab.co.uk for you. It is registered in your name and yours to take with you whenever, so it is yours from day one.

The email. I would go with Google Workspace for info@ and pujan@dentalgrowthlab.co.uk. It is the best option by a distance: a proper inbox you log into, around £5 to £6 an address a month. To answer exactly what you asked, mail sent to those addresses lands in the new inbox, and anything you send shows as coming from your dentalgrowthlab.co.uk address. Clean both ways. It is a quick job and sits under the £25 an hour technical help.

Your project portal

I will set up a shared Google Drive as your home for everything: your current email and the new addresses, your assets, your copy, and the work as it comes together. One place, nothing scattered, and you always know where to look.

What I need from you

- Your logo, once it is ready
- The colours and feel you want
- Your testimonials for the Results page (owner photo, practice, quote)
- Your new email and limited company details, once they are set up

Your copy is already sorted, so that is the short list. Anything not ready yet, we will cover on Wednesday.

One bit of housekeeping

Once your limited company is registered, send the details over and I will update the agreement and invoice to the company name, so it is all clean for your records.

How to reach me

webdev@judepotter.net is the fastest way to get me. I will keep you posted at every stage, so nothing ever goes quiet.

Right, let us build something good.

Jude
