

Dental Growth Lab: Development Update

5 to 8 October 2026

Where we are

The site has moved on a lot over the last two days. Every change from your feedback is in, the copy now comes straight from your 4th October document, and the mobile version is finished. In line with our agreement, I'd like to have everything wrapped up and live by **Thursday 15 October**.

Worth knowing: Thursday 15 October is the date I'm working towards. Anything beyond that point is covered as technical help time, at £25 per hour.

What's changed

Your words, exactly as written. All the copy on the site now comes from your 4th October document. I only fixed the typos. The 20 pain point quotes run in your order and finish on Frustration. The pillars are the shorter versions, with no icons. Your pricing (£1,500 a month and £995) now sits in Next Steps only.

Testimonials. There's a new Testimonials page. The order is Mohit, Jasdeep, then Mital. Each one shows four lines, with a Read more link for the rest. Video to embed at last stage.

Pages and navigation.

- "Your Practice" is added to the menu and jumps to the pain points.
- "Contact" and every Book a Call button now take people to one booking page.
- The home page ends on three simple tiles: Testimonials, How We Work, Book a Call. This is a fantastic strong ending.
- I removed the old Style 1/Style 2 switch and moved everything under How we can Help to separate pages.

Look and feel.

- The blue is slightly lighter across the site.
- The pain points and "Is Dental Coaching For Me?" sit on a deeper blue so they stand out.
- The footer is about a third shorter. (relevant to smaller devices)

Section by section.

- **Hero:** Dental Growth Lab, your desk photo, no button. On phones there's a gentle pulsing "Scroll" cue.

- **Reframe:** I added the "But..." moment, with Book a Call under "that don't depend on them".
- **Pain points:** white cards in two piles, a bigger Frustration card to finish, then "Dental Growth Lab can fix this" with the underline drawn in.
- **My Story:** every line now appears as you scroll. Purchased and Sold sit side by side in a clean comparison, with a dash and a cross for the old way and ticks for the coaching way.
- **How We Work:** a bigger, easier read, a quick FAQ index, a smoother timeline, and a closing "Ready" moment.
- **How We Can Help:** four cards around your photo. One card changes with each scroll, a progress line sits underneath, and Freedom rolls round to finish on the right. On phones it becomes a swipe carousel.

My recommendation on the pain points

I sent you a voice note about this. I'd like to go back to the earlier version, where the pain point cards scatter across the screen and then gather into "Dental Growth Lab can fix this". The stacked version we have now is tidy, but the scatter holds attention much better. It lets a visitor feel the weight of those frustrations before the answer arrives, and that's the whole point of the section. I have screen recordings of the earlier version to show you.

This is the main change I'd like to make next. Everything else stays as it is.

Mobile

Mobile optimisation is finished and I'm really happy with how it feels. The cards swipe cleanly, nothing jumps or clips, buttons are easy to tap, and the page behaves properly on iPhone and iPad. I've tested it at a wide range of screen sizes.

Still to connect

None of this is urgent, because nobody is looking at the site **yet**. We can do it together in person when your laptop arrives.

- The website email address
- The contact form key, so enquiries land in your inbox
- Your phone number
- Your Calendly link, so Book a Call works
- Everything you mentioned on email

Housekeeping before go live

- Publish the latest version, so what you see on your phone is the current build.
- Tidy up some leftover styling and compress three large images so the site loads faster.
- Do a final check of the lighter blue, to make sure the text reads clearly everywhere.
- Fill in the connections above and test the booking and contact form end to end.
- One last read through the site on laptop, iPad and phone.

Next steps

1. I revert the pain points to the scatter animation, so you can see it.
 2. You tell me what you think of it.
 3. We connect the email, form, phone number and Calendly.
 4. Final checks, then we're live by Thursday 15 October.
-

Hope this all makes sense! Same link as before, let me know your thoughts.
